Professional Summary

Computer Science undergraduate specializing in AI, with strong foundations in data structures, algorithms, and full-stack development. Experienced in designing and building backend systems, REST APIs, and real-time applications using Python, FastAPI, and modern JavaScript frameworks.

Education

USICT, Guru Gobind Singh Indraprastha University, New Delhi *Expected 2028*
B.Tech, Computer Science and Engineering (Artificial Intelligence Specialization)

Projects

Akhada – Enterprise-Grade Fitness Ecosystem Backend GitHub
FastAPI, PostgreSQL, PostGIS, OpenStreetMap Overpass API, JWT Authentication

- Architecting a B2B2C backend for Smart India Hackathon (SIH) connecting gym owners, trainers, and members, with JWT-based authentication and role-based access control.
- Designed RESTful APIs and PostgreSQL/PostGIS schemas to support geo-spatial queries for gym discovery, membership management, and trainer onboarding at scale.
- Integrated the OpenStreetMap Overpass API for location-based search, optimizing query performance for real-time geo-filtering.

TerraVision – AI Urban Planning Platform GitHub
React, Tailwind CSS, FastAPI, Firebase, Gemini API, Vercel

- Built a full-stack platform with interactive map-based dashboards visualizing AQI, heat hotspots, EV density, and green infrastructure data.
- Integrated the Gemini API to generate AI-driven policy recommendations and before/after simulations, deployed on Vercel with a Firebase backend.

NavDrishti – AI Smart Cane for the Visually Impaired Top 15, Eclipse 6.0
React, FastAPI, WebSockets, Python, Raspberry Pi

- Developed a real-time monitoring dashboard consuming sensor and AI-model data from an edge-deployed smart cane via WebSockets, achieving sub-second alert latency.
- Designed the API contract and data flow between the Raspberry Pi edge inference pipeline and the frontend dashboard.

Skills

Languages: Python, JavaScript, C, C++, HTML5, CSS3
Frameworks/Libraries: React.js, FastAPI, Flask.
Databases: PostgreSQL (PostGIS), MongoDB, Firebase
Tools: Git, GitHub, Docker, Postman, Vercel, VS Code
Coursework: DSA, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering

Experience

AI/ML Intern *June 2026 – Present*
AICTE Idea Lab, GGSIPU

- Contributing to AI/ML projects under faculty guidance, building and testing model pipelines for real-world applications.
- Collaborating with a technical team to implement and iterate on machine learning solutions, applying software engineering best practices.

Training & Placement Coordinator (Core Team) *2024 – Present*
USICT Training & Placement Cell / IPU Placement Cell

- Built and maintained internal tools and processes for coordinating placement drives across recruiter communication, scheduling, and hiring logistics for companies including Nagarro, TCS, and Infosys.

Achievements

- Ranked in the Top 70 of 3,300+ teams at AlgoVerse Hackathon 2025.
- Reached the finale round of Trivizardathon 1.0 (MLSA – GLA University Chapter).
